EASY SPACE DIVISION

FP Accordion Door is an easy-to-use space divider, which is popular year after year in offices, day-care centres and schools. The accordion door works perfectly as a sound insulator, and its soft surface improves room acoustics.

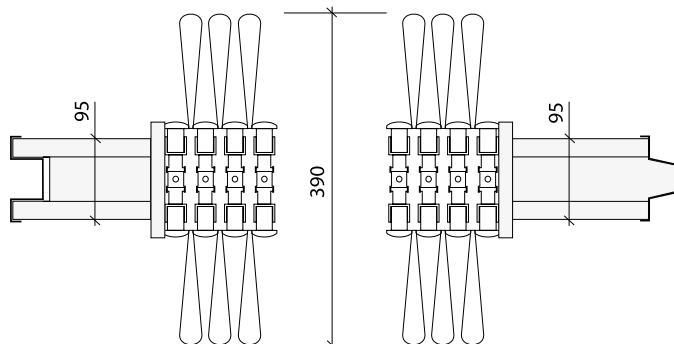

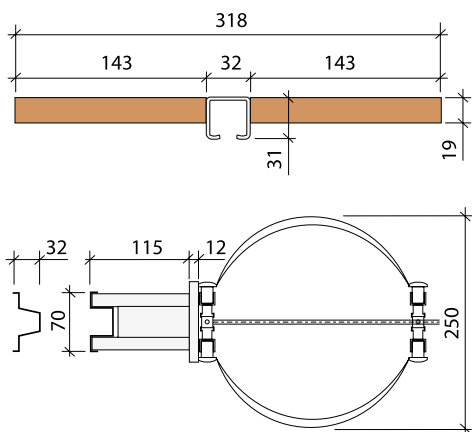

The FP Accordion Door is available with an artificial leather or felt surface. There are several colour options. The wooden strips of the felt door are made of pine and either coated with the same felt or waxed/painted in the desired shade. We use durable aluminium as the frame material and steel as the scissor mechanism material.

The accordion door is available in single-door or pairdoor, and the pairdoors sections can also be installed at an angle of 90°.

The FP Accordion Door with a felt surface is a stylish space division solution for various spaces.
